

Professional Statement:

My name is Priyanka Hichkad. I am a cybersecurity enthusiast with strong analytical skills. With so many scams happening around us, I feel an urge to safeguard information and infrastructure. Attacks always happen in an uncertain way, which is difficult to tackle and thus excites me, as I enjoy problem-solving and staying ahead. I always keep myself updated on current threats and technologies evolving around us.

One of my strengths is my problem-solving ability. I enjoy identifying vulnerabilities and developing innovative strategies to mitigate risk. In cybersecurity, staying ahead of threats is essential; thus, one must always be aware and ready.

Communication and collaboration are again among my strengths. This ensures that my team and the stakeholders understand the significance of security and their roles, which help maintain a safe environment.

I believe in the importance of ethical practices, ensuring protection and trust. As it is said, with power comes responsibility, and I absolutely follow all the rules to foster accountability and transparency. I always share my insights with my family and friends to make more people aware of cyber attacks.

As I continue to advance in my professional journey, I am eager to leverage my strengths and values to support the security goals of the organisations I serve. I aim to make a meaningful impact by fostering secure environments and promoting ethical practices in cybersecurity. My ultimate goal is to contribute to a safer digital world for all.
